

BR ID	S ID	Strategy
1	1	Boundary Analysis testing for username/password length
	2	Equivalence Partition testing for the uniqueness of usernames
	3	Exploratory Testing to see if passwords are in plain text in any places we have access to in the provided software
	4	Error Guess Testing to see if the passwords are in plain text in the interface for the application when a regular user creates an account
	5	Error Guess Testing to perform Acceptance Testing for the Use Case
2	1	Error Guess Testing to see if the passwords are in plain text in the interface for the application when a regular user logs in
	2	Equivalence Partitioning to login in with existing users or nonexistent users
	3	Error Guess Testing to perform Acceptance Testing for the Use Case
	4	Error Guess Testing to see if a logged in user can logout
3	1	Error Guess Testing to see if only logged in users can access home page of Planetarium
	2	Error Guess Testing to perform Acceptance Testing for Use Case
4	1	Boundary Analysis Testing for Planet name length
	2	Equivalence Partion Testing for the uniqueness of Planet names
	3	Expoloratory Testing + Error Guess Testing to see that user is owner of Planet
	4	Equivalence Parition Testing for valid Planet Image files
	5	Error Guess Testing to perform Acceptance Testing for the Use Case
5	1	Equivalence Partition Testing to see if Planet exists
	2	Equivalence Partitoin Testing to see if Planet is owned by user

	3	Equivalence Partition Testing to see if Planet has a Moon in the database
	4	Error Guess Testing to perform Acceptance Testing for the Use Case
6	1	Boundary Analysis Testing for Moon name length
	2	Equivalence Partition Testing for the uniqueness of Moon names
	3	Equivalence Partition Testing to see if owner Planet exists
	4	Equivalence Partition Testing g to see that user is owner of Planet that Moon is orbiting
	5	Equivalence Partition Testing for valid Moon Image files
	6	Error Guess Testing to perform Acceptance Testing for the Use Case
7	1	Equivalence Partition Testing to see if Moon exists
	2	Equivalence Partitoin Testing to see if obited Planet is owned by user
	3	Error Guess Testing to perform Acceptance Testing for the Use Case
